

C\

1 38. (New) An apparatus comprising:  
2 at least one processor;  
3 a memory coupled to the at least one processor; and  
4 a computer program residing in the memory, said computer program commencing to  
5 download a file referencing a plurality of components, said computer program dynamically  
6 prompting a user to select which of said plurality of components to download.

1 39. (New) The apparatus of claim 38 wherein said computer program comprises a web  
2 browser application.

x

1 40. (New) The apparatus of claim 38 wherein said file comprises a hypertext markup  
2 language (HTML) document.

1 41. (New) The apparatus of claim 38 wherein said computer program includes a  
2 component download selection mechanism, said component download selection mechanism  
3 dynamically creating a component download selection list when said file with said plurality  
4 of components is downloaded.

1 42. (New) The apparatus of claim 41 wherein said computer program comprises a web  
2 browser and wherein said component download selection list is formed in a second pane of  
3 said web browser and displayed with said file.

1 43. (New) The apparatus of claim 41 wherein said component download selection list is  
2 formed in a dialog box.

1 44. (New) The apparatus of claim 41 wherein the component download list is inserted into  
2 said file and displayed to a user with said file.

1 45. (New) The apparatus of claim 41 wherein said component download selection list  
2 contains the file name for each of said plurality of components.

1 46. (New) The apparatus of claim 41 wherein said component download selection list  
2 contains the type for each said plurality of components.

C 1 47. (New) The apparatus of claim 41 wherein said component download selection list  
2 contains the size of each said plurality of components.

1 48. (New) The apparatus of claim 41 wherein said component download selection list  
2 includes a status item, said status item dynamically displaying the amount of each of said  
3 plurality of components that has been downloaded.

1 49. (New) The apparatus of claim 48 wherein said status item includes the percentage of  
2 a component downloaded.

1 50. (New) A method for downloading a document, the document including a document  
2 with references to a plurality of components, the method comprising the steps of:  
3 a) downloading said document;  
4 b) prompting a user to select which of said plurality of components to download; and  
5 c) downloading said selected components.

- 1 51. (New) The method of claim 50 wherein the document comprises an HTML document. = 40
- 1 52. (New) The method of claim 50 wherein the step of prompting a user to select which  
2 of said plurality of components to download comprises displaying a component download  
3 selection list. = 41
- 1 53. (New) The method of claim 52 wherein said component download selection list  
2 comprises a dialog box. = 43
- C 1 54. (New) The method of claim 52 wherein said component download selection list  
2 comprises is displayed in a pane in a web browser. = 42
- 1 55. (New) The method of claim 52 wherein said component download selection list is  
2 inserted into said document. = 44
- 1 56. (New) The method of claim 52 wherein said component download selection list  
2 comprises the file name for each of said plurality of components. 45
- 1 57. (New) The method of claim 52 wherein said component download selection list  
2 comprises the type for each said plurality of components. 46
- 1 58. (New) The method of claim 52 wherein said component download selection list  
2 comprises the size for each said plurality of components. 47

1 59. (New) The method of claim 50 wherein said component download selection list  
2 comprises a status item, said status item dynamically displaying the amount of each of said  
3 plurality of components that has been downloaded.

= 48

1 60. (New) The method of claim 59 wherein said status item includes the percentage of a  
2 component downloaded.

= 49

1 61. (New) A program product comprising:

2 (A) a computer program, said computer program commencing to download a file  
3 referencing a plurality of components, said computer program dynamically prompting a user  
4 to select which of said plurality of components to download; and

5 (B) signal bearing media bearing said download selection mechanism.

C\

1 62. (New) The program product of claim 61 wherein said computer program includes a  
2 component download selection mechanism, said component download selection mechanism  
3 dynamically creating a component download selection list when said file with said plurality  
4 of components is downloaded.

1 63. (New) The program product of claim 61 wherein the signal bearing media comprises  
2 recordable media.

1 64. (New) The program product of claim 61 wherein the signal bearing media comprises  
2 transmission media.

- 1 65. (New) The program product of claim 61 wherein said computer program comprises : 39  
2 a web browser application.
- 1 66. (New) The program product of claim 62 wherein said component download selection = 43  
2 list is formed in a dialog box.
- 1 67. (New) The program product of claim 62 wherein the component download list is = 44  
2 inserted into said file and displayed to a user with said file.
- 1 68. (New) The program product of claim 61 wherein said file comprises a hypertext = 40  
2 markup language (HTML) document.
- C 1 69. (New) The program product of claim 62 wherein said component download selection = 45  
2 list contains the file name for each of said plurality of components.
- 1 70. (New) The program product of claim 62 wherein said component download selection = 46  
2 list contains the type for each said plurality of components.
- 1 71. (New) The program product of claim 62 wherein said component download selection = 47  
2 list contains the size of each said plurality of components.
- 1 72. (New) The program product of claim 62 wherein said component download selection = 48  
2 list includes a status item, said status item dynamically displaying the amount of each of said  
3 plurality of components that has been downloaded.
